A4: Initial Database Schema

Due Tuesday by 1pm   **Points** 100   **Submitting** a file upload

SurveySez Initial Schema: For this assignment you will create a prospective version of an initial database design for the **SurveySez** project.

This design must include all tables and fields, along with the data types for each field. The design itself should take the form of a single SQL script, which should run properly at a MySQL command line.

To Get Started: For details, and to get a starter SQL file to expand upon into the assignment requirements, view the **Database Schema Page**

So what is ACTUALLY due for this assignment?:

- A **WORKING** MySQL script to create prototype **SurveySez** database tables
- A minimum **three** linked tables (two are provided - Surveys & Questions)
- All fields must have appropriate data types
- An ERD to show how your tables are linked
- Place links to script and ERD and link to your construction/homework page The format can be image, word doc, text.   *(No .vsd or other odd format files, please)*

🕐**Hard Due Date:** We need this doc for class next Tuesday. To submit this late is to incur a 20% penalty. We need this for class**, so please get it done on time!**

Extra Credit: 10 extra points for any student who brings a printed copy to class on the due date!
